

Water and Utilities Committee By Jeffrey Lin
March 2021

Since I am relatively new in this assignment, there are a lot to learn to be effective in making a productive report to you all. As far as I understand, hacienda heights area is being serviced by the following utility companies or agencies:

- Gas- Southern California Gas Company
- Power- Southern California Edison
- Trash - Valley Vista Services
- Water- Depending on locations, we are served by two separate Water companies: Suburban Water systems and San Gabriel Water Company

In addition to those major utilities, there are cable services including Direct TV, Spectrum and Frontier, as well as telephone and Internet service providers such as Spectrum, Frontier and Hughes Net.

In general, all utility services in the Hacienda Heights area have been smooth without major issues since the beginning of 2021. Although we have not had sufficient rainfall in this past winter thus far, Suburban Water System has not implemented any new water use restrictions. Water use goals will be determined for the utility's (Suburban) overall water use; individual customers will not be given targets. Suburban will work with customers to use water efficiently and meet the States goals once they have been identified.

San Gabriel Water Company serves the vast western part of Hacienda Heights area. They continue to urge residents to conserve water use, discourage residents to hose off sidewalks, driveways and other hardscapes, wash a motor vehicle with a hose, unless the hose is fitted with a shut-off nozzle, operate a fountain or decorative water feature, unless the water is part of a recirculating system, water outdoor landscape in a manner that causes excess runoff, or within 48 hours following measurable precipitation, and Irrigate with potable water of ornamental turf on public street medians.

Any additional water conservation measure may follow as rainfall condition unfolds in the next months.

-End of Report-
