

## Streets and highways report—November 2013

- County public work completed posting of no parking any time for vehicles over 5000 lbs signs along Stimson in front of YMCA and learning center. It seems be working. Thanks for Dick and James's following up.
- Also, Received Mr. David Warren's letter on 10/31 he was question why street tress was cut off near the ground on the west of Stimson near Colima. Thanks for Bella's quick response from Los Angeles County mentioned that the county road maintenance crew informs her that this tree was removed on October 8th when it was discovered it had split in half and was too damaged to save. The stump removal will be completed with others on later date. There are no projects scheduled in the area.
